Consultation summary

Weight Management — Repeat Supply · 28/08/2026

PATIENT
Margaret Kelly
14/03/1958

RECORDED AT THE CONSULTATION

Current weight	84.2 kg
Weight at last supply	86.9 kg
Change since last supply	2.7 kg (3.1%)
BMI	29.4
Waist circumference	96 cm
Current strength	5 mg
Requested dose	Same
Requested supply	2 months
Appetite suppression	Good
Snacking between meals	Occasionally
Hydration	About 1.5 litres a day
Missed doses in the last 4 weeks	None
Adverse effects	Mild nausea in the first two days
Changes to medicines or health since last supply	No
Pregnant or breastfeeding	No
Site of administration	Self-injection (abdomen)
Type of injection	Subcutaneous
Funded by	Private

ADVICE GIVEN

- Weight loss of 3.1% since last supply is on track. Continuing at the same strength is appropriate.
- Aim for at least 2 litres of fluid a day — mild nausea and constipation are more common below this.
- Two months of supply requires six weeks stable on the current dose. Pharmacist review required before this can be approved.
